

BIG RED BUTTON

MAKE A STATEMENT.

This Club Cannon Big Red Button DMX Controller is a plug and play unit, designed to be used with any CO2 Jet or Special FX product with DMX control. Simply link all of your products together with DMX cables, plug in to the controller, and you are ready to go.

The key lock switch makes it easy to only allow authorized personnel to control your effects.

By default, this controller triggers DMX CH1 @255.

FEATURES:

- Black aluminum enclosure
- Large LED Illuminated Button
- UV fluorescent silk screen
- Key lock switch
- 3 pin or 5 pin DMX output
- Neutrik True1 power inlet
- 100v-240v operation
- Made in the USA!

NOTES:

The Club Cannon Big Red Button DMX Controller ships pre-programmed to be compatible with all Club Cannon CO2 Jets. It is also compatible with off-brand, generic CO2 jets. If you plan to use this controller with a different brand CO2 Jet, please let us know the brand and model so we can reference the DMX structure.

This controller can also be used to trigger other special effects equipment, such as Confetti, Fans, Lights, etc.
